

# Drugs Do Not Heal

223,000,000 AMERICANS TAKE  
AT LEAST ONE PRESCRIPTION

I'm **NOT** one of them

fb/ get majestic freedom

Drugs maintain disease symptoms and makes junkies of us all.

Anyone who does not believe this should stop taking their prescribed medications and wait. The disease or illness will return because it never left. Big Pharma knows there is not much profit in curing people so they design medications to treat disease symptoms. The underlying disease is always still present, and our symptoms are maintained by the expensive medications prescribed to hide the real disease. Once medications are prescribed for us, we must take them for life. WE ARE A NATION OF ADDICTS!
